

### F9 Version 4.5 Retirement

- Mainstream and extended support for Infor F9 Version 4.x ended on June 1, 2014. Level 3 limited support of online and telephone support will end on April 30, 2015. Maintenance invoices for clients on Version 4.x will not be sent after December 31, 2014.

### F9 version 5.0 will run on

- Excel 2007
- Excel 2010 (32 bit and 64 bit)
- Excel 2013 (32 bit and 64 bit desktop applications)

### Supported Operating Systems

- Windows 7 (32 and 64 bit)
- Windows 8 (32 and 64 bit)
  - F9 version 5 only is supported
- Windows Server 2003 and 2003 R2 (32 and 64 bit)
- Windows Server 2008 (32 and 64 bit) and 2008 R2 (64 bit)
- Windows Server 2012 (64 bit)
- Terminal Server and Citrix on Windows Server 2003 and 2003 R2 (32 and 64 bit)
- Terminal Server and Citrix on Windows Server 2008 (32 and 64 bit) and 2008 R2 (64 bit)
- F9 Version 5 requires .NET Framework 3.5. On some Windows operating systems, .NET Framework must be enabled as a feature within the operating system.

### Note

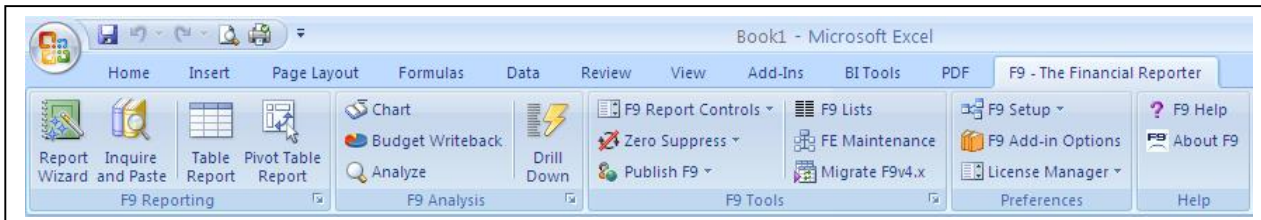

- F9 version 5 has separate installs for 32 bit vs 64 bit versions of Excel.
- Versions of Office before Office 2010 were 32 bit. Office 2010 was the first version available in both 32 bit and 64 bit versions. To determine your version of Excel, go to File, Help and view the About Microsoft Excel section.
